

Christian Abbot

562-551-4719 | coabbot@cpp.edu | linkedin.com/tivvn | github.com/tivnn
Software Engineer focused on AI, APIs, and rapid prototyping

EDUCATION

California State Polytechnic University, Pomona

B.S. Computer Science, Minor in AI

Pomona, CA

Expected 2028

Pasadena City College

A.S. Applied Science & Natural Science

Pasadena, CA

2026

EXPERIENCE

Northrop Grumman STEM Internship

STEM Intern & Team Lead

Sep 2024 – Jan 2025

Rio Hondo College, CA

- Led 5 interns to prototype AI-driven solutions improving workflow efficiency
- Explored real-world AI applications through testing and iterative problem-solving
- Presented technical solutions to engineers on integrating AI into systems
- Proposed Python-based AI integration concept for internal workflows

Election Data Integrity Analyst

FPM Petition Management

Jan 2026 – Present

West Covina, CA

- Verified high-volume voter datasets ensuring accuracy and compliance
- Identified and resolved inconsistencies in structured data
- Maintained precision handling sensitive information under strict standards

Geek Squad Agent & Sales Advisor

Best Buy

Sep 2023 – Jan 2026

CA

- Diagnosed hardware/software issues using structured debugging methods
- Simplified complex technical problems for non-technical users
- Managed multiple tasks in fast-paced, customer-facing environments

PROJECTS

AI Application Prototypes

Python, REST APIs, Generative AI APIs

Ongoing

- Built AI prototypes using generative APIs with focus on prompt engineering
- Integrated REST APIs into application workflows
- Optimized outputs through prompt tuning and testing
- Rapidly iterated features demonstrating fast learning ability

Interactive Web Application

React, JavaScript, HTML/CSS

2025

- Developed interactive React app with modular UI components
- Implemented responsive design for usability across devices
- Deployed via GitHub Pages with version control using Git

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, SQL

Technologies: REST APIs, React, Generative AI APIs

Tools: Git, GitHub, VS Code, Visual Studio

Concepts: OOP, Data Structures, API Integration, Prompt Engineering
